Jind, Haryana

Relevant Coursework

- Data Structures And Algorithms
- Database Management
- Computer Communication
- Operating Systems
- Computer Networking
- Automata and Compiler Design

Projects

Inventory Control Management System |

April 2023

- Developed a web application utilizing HTML, CSS, and Javascript for the frontend, and Node.js for server-side operations.
- Implemented SQL to efficiently manage the database and seamlessly fetch data for the application.
- Enabled users to view a comprehensive list of items in the inventory, track monthly sales, and access pricing and quantity details for each item.
- Demonstrated proficiency in integrating various technologies to create a user-friendly and interactive inventory management solution.

Weather Forecasting Application |

Jan 2023

- Designed a user-friendly GUI application using Tkinter, a Python library, to provide real-time weather forecasts for various cities.
- Utilized Geopy to access geographic data and OpenWeather API to fetch weather information for accurate and up-to-date results.
- Empowered users to retrieve essential weather data, including temperature, humidity, pressure, and wind speed, at their fingertips.
- Executed a comprehensive weather report feature, offering weekly forecasts for a more informed planning and decision-making.

Portfolio Website |

Nov 2022

- Created a responsive web application using HTML, CSS, and Javascript to showcase a personal portfolio.
- Included sections for Home, About, Services, and Contact to provide a comprehensive overview of projects and services.
- Applied interactive features and a user-friendly contact form to enhance user engagement and facilitate communication.

Technical Skills

Languages: C, CPP

Web Development: HTML, CSS, JavaScript

Libraries/Frameworks: Tailwind CSS, React.js, Tkinter, MySQL
